

FAASTeam presents:

VFR Flight Plans-Initial Planning to Search and Rescue (And Everything In Between)

Are you just "checking the box" when filing a VFR flight plan? We'll focus on the planning of your VFR flight plan; will there be multiple stops enroute? Are you getting fuel? How are you going to open the flight plan? Have you heard about the LMFS Easy Activate and Easy Close features? How about position reports? Are they useful? What is Surveillance Enhanced SAR and how can you make it work for you? You don't need a VFR flight plan...you're going to get flight following from ATC...that works, right? You are 20 miles out from your destination and you call "radio" to cancel your VFR flight plan...all good...right? You have catastrophic engine failure at low altitude; no time to make a mayday call. You are banged up, and your passenger is injured. You are still on your VFR flight plan. When are they going to come and look for me? What tools does the Civil Air Patrol put to use in the effort? Join us for the answers to these questions, and take an opportunity to think about the ultimate purpose of a VFR flight plan. NOTE: THERE WILL BE 2 SEMINARS COVERING THE SAME TOPICS- FIRST AT 1100L AND SECOND AT 1400L These seminars are conducted in conjunction with the Denton Composite Squadron of the Civil Air Patrol's open house. Follow the signs and visit their hangars and displays. The

Event Details

Sat, May 3, 2014 - 11:00 am

U.S. Aviation-Denton

4850 Spartan Dr
Denton, TX 76207
